Community Reviews. Callen does a pretty good job of putting together a consistent theory of thermodynamics from first principles. My difficulty with thermodynamics is often that they tend to pull results out of nowhere, either based on problems I didn't do or assumed knowledge of some obscure combinations of partial derivatives and identities.

peratures: Callen 5.3-8 and 5.3-9 Once we start in with statistical mechanics, you will find that it is trivial to compute the free energy F of a system of N noninteracting two-level systems (e.g. an Ising spin in a magnetic field or an atom with only one excited state). Right now, we will take that result to explore the thermodynamics of such a ...
