Car Engine Doesn't Start

If the car won't start, check the basic things first: • Is the battery OK? Read the next paragraph how to check the battery. • If the car doesn't start with the automatic transmission in "Park," does it start in "Neutral"? Sometimes a car won't start in "Park" but starts in "Neutral" because of a problem with a neutral safety switch.

Why a car won't start - troubleshooting tips

The car cranks over but won't start. Check the fuel supply to your engine. If that's okay, check whether the electrical spark is getting to your spark plugs. The engine starts but dies. If your car has a carburetor, check your carburetor adjustment and your choke to see whether the choke is first closing and then opening.

Troubleshooting a Car That Won't Start - dummies

Test the starter solenoid. If jump starting the car didn't work, there may be an issue with the starter or solenoid. Start by testing the starter solenoid using a test light. Touch the test light to the bottom terminal on the solenoid and ground the negative cable on the body of the vehicle.

3 Ways to Fix a Car That Doesn't Start - wikiHow

When an Engine Won't Crank, But the Lights and Radio Work. There are a number of ways to tackle a problem like this, but the most likely culprits are a blown fuse or fusible link, bad starter, bad ignition switch, or a dead car battery. The easiest one to rule out is the battery, which is why it's a good place to start.

Why Your Car Won't Start Even Though the Lights Work

Cranks, doesn't run If the starter cranks the engine normally, but the engine refuses to run, the battery, starter and alternator are probably fine. The cause lies elsewhere.

9 reasons why your car won't start - Chicago Tribune

When the starter begins to wear out, you may find that one day your car fails to start, then starts perfectly fine the next seven days. On the eighth day, it fails again. It can be very frustrating, but this is also a sign that you need a new starter on your engine.

What to Do When Your Car Won't Start or Turn Over

If you can locate the starter under the hood of your car, you can check if it's the source of the problem. If you don't hear clicking when you start the engine, the problem may be a dead battery. If you hear clicking, but the engine doesn't crank, the starter might not be getting enough electricity.

Top 6 Reasons Why Your Car Doesn't Start - H&H Mobil Fuels ...

Your car engine needs fuel, compression, and a spark to start. When your engine cranks but won't start or run, it could mean your engine is having trouble producing a spark, getting fuel, or creating compression. The most common causes are in the ignition (for example, a bad ignition coil) or fuel system (for example, a clogged fuel filter).
