Jerico Performance

But the difference between clutchless shifting a motorcycle and clutchless shifting a car is fundamental, and it is more than just bigger moving parts and less fine control. Almost all manual transmission bikes use constant mesh gearboxes. Almost all manual cars use synchromesh gearboxes. There is a fundamental difference in how gears are selected.

Clutchless Shifting : motorcycles - reddit

Best Answer: The clutchless manual is not a true manual, but rather it is an automatic slushbox where you can simply tell the gearbox when to upshift and downshift. Depending on the system it may automatically upshift or downshift for you if you begin to breach its limits, and might not result in the same mpg you would expect from a manual transmission car.

Clutchless Manual...? | Yahoo Answers
