Is it Safe to Drive with the Oil Light On? No. Driving with low oil pressure or low oil in the system can ruin the vehicle's engine, completely breaking the motor. If you notice the oil light on while you are driving or while the car is running, you should stop driving and have this problem addressed as soon as possible.

Is it Safe to Drive With the Oil Light On? | YourMechanic ...

In either case, an oil change has little or nothing to do with the check engine light being on. They're effectively separate systems. The engine oil, when the engine isn't running, sits at the bottom of the engine in a pan and is then circulated around the engine by means of a pump.

I got an oil change and now the check engine light is back ...

Very simple situation -- my check engine light went on tonight for the first time (I tightened the gas cap and that didn't make it go off). I have 81,000 miles and turns out I am in need of an oil change (last one was at 76k and I usually get it every 5k miles).

Will getting oil change make my check engine light go away ...

Do not reset the oil light unless you have actually changed the oil. The light is there to tell you when it's time to change the oil. Resetting the light without changing the oil may cause you to miss an oil change, which can damage your engine.

How to Reset the Oil Light After an Oil Change | It Still Runs

However this weird thing happens when I get near my oil change times. The first thing that happens is around 300 miles before oil change time it lights up low oil light, as well as the tire pressure light. Then when I get to around 150 to 100 miles left the check engine light will once and awhile come on as well.

Check engine light and oil light comes on before oil change?

Since that time, every new car sold in the United States has required a "Check Engine" light, mainly to be compliant with Environmental Protection Agency regulations. But after all these years, "Check Engine" lights remain a mystery to many technicians and automotive do-it-yourselfers. How the "Check Engine" light works

How to fix your "Check Engine" light | Mobil™ Motor Oils

The check engine light should not come on after doing an oil change and coolant flush/fill. That light is not a service condition based light. The check engine light only comes on when the on-board computer detects a fault in engine driveability or performance, transmission control system or transmission, or the emissions system, and a fault ...
