In some cultures, the role of the matchmaker was and is quite professionalized. The Ashkenazi Jewish shadchan, or the Hindu astrologer, were often thought to be essential advisors and also helped in finding right spouses as they had links and a relation of good faith with the families. In cultures where arranged marriages were the rule, the astrologer often claimed that the stars sanctified ...

Linearity is the property of a mathematical relationship or function which means that it can be graphically represented as a straight line. Examples are the relationship of voltage and current across a resistor (R), or the mass and weight of an object. Proportionality implies linearity, but linearity does not imply proportionality.
