Now as I understand it, Canox units are simply re-badged Millers which were sold under the Canox name (before BOC bought Canox). Unit is less than 10 years old, has HF, and hasn't seen much use at all. My question is, can anybody ID the matching MILLER welder which this was re-badged from, so I can dig up the manual online?

I have an older Canox gasoline powered welder/generator that has problems with the auto idle system . its serial is jk700632 and all of the manuals that i can find are not correct in the wiring diagrams. This one has a toggle switch in the middle of the front panel to select weld or power . this switch is not in the schematics that i have found ...

Miller legend schematic - Miller Welding Discussion Forums

A welder can be AC or DC or both. It must have rectifiers to convert the AC welder output to DC. (Edit: unless it's a rotary DC generator type welder). The Miller 88 is an AC welder (unless someone converted it), so you would set the switch for AC. If you had a welder like a Dialarc, you could connect either AC or DC and set the switch accordingly.
