Hi: I'm dealing with a Comfortmaker RPJ II that works sporadically. I have to flip the switch to start it even though the thermostat is set 10-20 degrees higher than the temperature reading. The furnace will ignite, blow hot air for a few minutes, then shut down, rarely reaching the desired temperature.

OK this may be a dumb question, but I can't for the life of me figure out how to change the filter on my RPJ II. As it stands, there is no filter, but we need to get one on there. I don't have the manual for the unit, so no help there. The only thing I could find online was a reference to an "RJP II" that pointed to the filter rack being external.
