I am having a problem with my engine. I have a 1998 4.3L V6 Mercruiser Engine. The other day while out boating it just died. I was able to restart it a few times at idle speed, but when I went to up the rpm's in neutral, it sounded like it flooded and would die. Now the engine turns over but won't catch. I have tried the following things:

Mercruiser or someone else) figured out that the 180 degrees was wrong. Since it has a 160 degree thermostat, mercruiser says it should not go above 160 degrees, no matter what! Apparently starting sometime in 1995, Mercruiser Alpha 1's began having a problem. Now I've heard 2 stories (Well 3, if you count the "There's nothing wrong").

Hi, I have problems with a Mercruiser 3.0 4-cyl, 5 years old. On idle, it runs like only on 3 cyl. Have changed spark plugs, wires, and manifold (frozen in the winter) plus tested compression and looked at the spark, fine. It seems like it is the last cyl, removing the plug wire sometimes makes no idle change. The dist cap looks like new.

### **I have problems with a Mercruiser 3.0 4-cyl, 5 years old ...**

I'm this close to buying a boat with the very common 135 HP 3 liter Mercruiser I/O powerplant mated to an Alpha I stern drive. 1997 model, electronic ignition, I think with a carb but am not sure. Were taking it out on a sea trial Friday. I know to check for things like water in crankcase oil and lower unit. Does anyone in this august and learned group have any experience these engines or ...
