RV.Net Open Roads Forum: Truck Campers: Battery Charging ...

It must effectively act as a non-return valve for electricity, allowing current to pass in one direction but not the other. An RV battery isolator may be cylindrical or flat and covered in fins like a heat sink, and will conventionally have three terminals.

How to Test an RV Battery Isolator | It Still Runs

A smart battery isolator is the ultra-simple and most technologically advanced method of automatic battery isolation. These units can be installed between batteries with a common ground to automatically control the charging process to the batteries but continue to provide isolation when a charging source is unavailable.

Dual Battery Smart Isolator 12v Relay for Auto/Boat/RV

On one of our earliest RV adventures, we learned the hard way about the importance of a battery isolator system. After our first night on the road, a chilly one where the furnace ran during the night, we found we couldn't start the truck up. The RV had "stolen" power from the truck battery, leaving us wandering around with a set of jumper cables, looking for a hot jump.</p>
