In this lab, you will perform four classes of chemical reactions. In the synthesis and decomposition reactions, you will observe changes in the appearance of substances and changes in mass. In the single-displacement reaction, you will use a pressure gauge and thermometer to observe the changes.

Lab Manual - Late Nite Labs

Matter undergoes three kinds of change: physical, chemical, and nuclear. While the composition of a chemical substance is not altered by physical changes (such as freezing and evaporation), chemical changes, or reactions, result in the formation of new substances when bonds are formed and/or broken.
