Chris Craft 327f Manual

The early SBC motors were all solid lifter designs. The 283 and 327F manual indicates valves are to be checked every 100 hours of operation, and clearance adjustments should be made when the engine is hot, with the intake at .008 and exhaust at .018 The way I check valve clearance is to run the engine hot and check them while the motor is running.

Historical Timeline | Chris-Craft Boats

I have a 1967 31 with 327f's. Port engine has a squeek caused by the circulating pump shaft bearing. I can see the pulley moving in and out. Last fall I bought a replacement pump, but now looking at the original CC manual (which perhaps I should have done before now) it looks like the pump pictured there is much different that the "normal" small block pump.
