Your car's engine compression can tell you a lot about the overall health of the engine. If your car is blowing blue smoke out of the tailpipe, or if your car is losing lots of oil, you could have a bad piston ring. This will also cause low compression in that cylinder, and a compression test will tell you.

We walk you through a compression test, a great way to determine the condition of your valves and piston rings. STEP 3 Turn the ignition on, depress the throttle, and crank the engine four revolutions. This should result in a stable reading; if not, crank up to 10 revolutions, but do the same with all cylinders. STEP 4 Mark the pressure reading for each cylinder on the valve cover in chalk, then move to the next cylinder.
