Chris Craft 350Q engines. Post by GJBan » Mon Sep 06, 2010 8:12 pm I have a pair of 350 Q 235 Hp(name on rocker arm cover)engines. There is a plate on the exhaust manifold saying (on the "L" or port engine) that the model is 283 and # 807433. Are these 350cid or 283cid engines. Is there anything someone can tell me about them.

**Chris Craft 350Q engines - Boat Buzz**

In theory you can replace your engine with another long block. However, there are some subtle things about a 350Q that you need to pay attention to when doing that kind of swap. As you know the 350Q engine is what Chris Craft called "flywheel forward". Traditionally, the transmission is attached to the flywheel end of the engine.

**BoaterEd - Chris Craft 350Q - replace with new Chevy?**

I don't really "need" an engine, mine runs great, but this guy is asking 300 for the pair, I would need to remove them but I've done that before, should be no sweat. My thought was to scoop them up, keep one engine and accessories and part or sell the other, then when my 318 finally if ever bites the dust I'd have an engine laying there for it.

" The port engine in my 350 Catalina (Chris Craft 350Q) fails to operate reliably. I have rebuilt the Carter Carb, check the compression in the engine and it is fine. I investigated the Mallory distributor, which was changed over to electronic ignition vice points, and the voltage and resistance measurements are ok. I found the flyweights in the distributor sticky, lubricated and exercised the ...

The original engines were Chevy 350s marinized by Chris Craft Marine Power and were known as 350Q and 350QL. Original horsepower was 235 and the new engines are 375. The repower got rather involved as the original engines sit backwards to the drive train - meaning that the timing chain end of the engine drives the transmission and the flywheel ...
